

Behaviour Guidelines for Visitors/Accompanying Persons in the Scope of the Covid-19 Pandemic

Dear Visitor,

A visit to the clinic is only possible if you have no cold symptoms, we also request that you observe the following behaviour guidelines:

	Keep your distance Please maintain a minimum distance of 1.5 m to other persons in all public areas, waiting zones etc.
	Wear a protective mask over mouth and nose Please wear a protective mask over mouth and nose throughout your time at Klinikum Fulda, (protective mask over mouth and nose or community mask), masks with exhalation valves are not permitted. Touch the protective mask over mouth and nose with your hands as little as possible.
	Hand hygiene Disinfect your hands on entering the clinic, after entering and before leaving the patient room and before leaving the clinic.
	Observe etiquette for coughing and sneezing When coughing or sneezing cover mouth and nose with a handkerchief or the crooked elbow and disinfect your hands afterwards. If possible, change your protective mask over mouth and nose.
	Smile instead of shaking hands Please refrain from shaking hands and give us a smile instead.
	Visiting hours and behaviour on the ward Please limit yourself to the official visiting hours of the clinic. In one patient room only one visitor may be present for one hour. Please report to the nursing staff at the nursing station before entering the patient room. In the event of failure to observe hygiene and behaviour guidelines we may enforce the house rules and expel visitors from the premises.
	Avoid public events Please avoid attending public events and places with large numbers of people during the time in which you wish to visit your relatives at Klinikum Fulda.

Thank you very much.

The Board of Klinikum Fulda
